

# FIRST ANNUAL LIVER WEEK

AUGUST  
24-28  
2020

## BILIARY ATRESIA

- Biliary Atresia (BA) **only occurs in newborn infants**.
- BA is rare and affects about 1 out of every 12,000 infants in the US.
- About 10-20% of infants with BA have abnormalities in other organs.
- It is thought that **approximately 80% of patients with BA will require a liver transplantation by the age of 20.**

## WHAT IS ALF DOING?

### FUNDING RESEARCH

The American Liver Foundation has **granted \$700,000** to researchers for the continued **study of Biliary Atresia and other pediatric liver diseases.**

### EDUCATION & AWARENESS

[BA Information Center](#)

[Ask the Experts](#)

### SUPPORT

[Pediatric Liver Disease Blog](#)

[Patient Stories](#)

[Clinical Trials](#)

### ADVOCACY

[National Patient Advisory Committee](#)

[Advocating for Liver Disease Blog](#)

[Virtual Hill Day](#)

[\(Register Today!\)](#)

## HOW YOU CAN HELP

**COVID-19 will reduce our funding** of research, education, support and advocacy **by a staggering 49%** - we need your help now more than ever! Please help us continue our fight against liver disease by making a donation today.

**DONATE NOW**
